Hi Eron, Yes, please do reoccupy SC-36 to collect samples for chlorobenzene analysis. I agree this is consistent with the work plan and a FCR is not necessary.

Thank you,
Madi

Subject: Arkema Project Area - Reoccupy SC-36 to Collect Chlorobenzene Samples

Hi Madi,

We received chlorobenzene data for SC-37 and SC-42 and there were some remediation threshold exceedances. The core for SC-36 was collected last year and the samples were not analyzed for chlorobenzene. Chlorobenzene testing at SC-36 is warranted based on the remediation threshold exceedances at SC-37 and SC-42 (see attached screenshot).

LSS would like to reoccupy SC-36 to collect samples for chlorobenzene analysis. I don't believe this is a deviation from the work plan, so an FCR form is probably not necessary.

Please let us know if it is ok to reoccupy SC-36 and if an FCR form is needed. Thanks!
